

User Acceptance Testing (UAT) Template

Date	27 June 2025
Team ID	LTVIP2025TMID47699
Project Name	HouseHunt
Maximum Marks	

Project Overview:

Project Name: HouseHunt

Project Description: A house rent app is typically a web application designed to help users find rental properties, apartments, or houses for rent and also post their property. This app often offer features to make the process of searching for and renting a property more convenient and efficient.

Project Version: 1

Testing Period: 16th June 2025 to 27th July 2025

Testing Scope:

Property Listings: The app provides a database of available rental properties, complete with detailed descriptions, photos, location, rent amount, and other relevant information.

Search Filters: Users can apply various filters to narrow down their search results based on criteria such as location, rent range, property type (apartment, house, room, etc.), number of bedrooms, amenities, and more.

Contact Landlords/Property Managers: The app might provide a way for users to contact the property owners or managers directly through the app, often through messaging or email.

User Registration: A user who is looking to buy/rent a new house and registers as a Buyer. They provide their email and create a password.

Browsing Properties: Upon logging in, the user is greeted with a dashboard showcasing available houses for sale. They can see listings with detailed descriptions, photos, and pricing information. The user applies filters to narrow down their search, specifying their desired location, price range, and the number of bedrooms.

Testing Environment:

URL:

<http://localhost:3000/>

<http://localhost:3000/subscription>

<http://localhost:3000/PropertyForm>

<http://localhost:3000/login>

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
